

GSPACEAI REPORT TEMPLATES AND STYLE GUIDE

Purpose

All GSpaceAi reports should feel like they were produced by a premium business consultant.

The customer should feel they received a report that would normally cost hundreds or thousands of dollars.

Reports should be:

- Professional
- Modern
- Executive-friendly
- Easy to scan
- Action-oriented
- Practical
- Specific
- Personalized

Reports should NOT feel like:

- AI-generated essays
- Walls of text
- Generic business advice
- Academic papers
- Technical documentation

UNIVERSAL REPORT STRUCTURE

Every report should follow the same visual structure.

Cover Page

GSpaceAi Logo

Report Title

Business Name

Prepared For: [Business Name]

Prepared By: GSpaceAi A GSpace Solutions Product

Executive Snapshot

This section appears near the beginning of every report.

Display:

Business Profile

- Industry
- Business Type
- Team Size
- Current Software Count

Key Metrics

- GSpace Consolidation Score™
- Estimated Monthly Software Spend
- Estimated Replaceable Monthly Spend
- Estimated Annual Savings
- Consolidation Opportunities Found
- Automation Opportunities Found

Display as a clean scorecard.

Priority Matrix

Every report should include a table similar to:

Priority	Opportunity	Impact	Difficulty
High	Replace Calendly	High	Low
High	Build Lead Tracker	High	Medium
Medium	Automate Follow-Ups	Medium	Medium

This section should be highly visual.

REPORT DESIGN RULES

Use:

- Section dividers
- Tables
- Scorecards
- Callout boxes
- Priority indicators
- Summary bullets

Avoid:

- Massive paragraphs
- Repeating information
- Generic filler
- Excessive explanations

No section should feel longer than necessary.

REPORT 1

Platform Consolidation Snapshot

Purpose:

Show the customer they likely have software overlap and potential savings.

Do NOT reveal the full roadmap.

Section 1

Executive Snapshot

Section 2

Current Software Inventory

Table:

Platform	Category	Estimated Cost	Purpose
----------	----------	----------------	---------

Section 3

Google Workspace Usage Review

Current Google Workspace Usage:

Summary

Observed Underutilization:

Bullet list

Section 4

GSpace Consolidation Score™

Display prominently.

Example:

82 / 100

Strong Consolidation Opportunity

Explanation:

Based on the software stack, overlap, and workflows identified during the assessment.

Section 5

Potential Consolidation Opportunities

Show:

Opportunity	Potential
Scheduling	High

Opportunity	Potential
Project Tracking	Medium
Forms	High

High level only.

No detailed roadmap.

Every major platform must receive a recommendation.

Section 3

Platform Replacement Analysis

For each major platform:

Current State

Assessment

Recommendation

Expected Outcome

Section 4

Google Workspace Consolidation Opportunities

List each opportunity.

Include:

- Why
 - What changes
 - Expected benefit
-

Section 5

Recommended Lightweight Systems

Examples:

Lead Tracker

Customer CRM

Scheduling System

Project Tracker

Employee Request System

Follow-Up System

Knowledge Base

Each recommendation should include:

Purpose

Google Components

Complexity

Expected Impact

Section 6

Quick Wins

Can be completed within 30 days.

Section 7

Medium Complexity Projects

Require moderate effort.

Section 8

Advanced Opportunities

Long-term improvements.

Section 9

Estimated Savings

Table:

Opportunity	Monthly Savings	Annual Savings
-------------	-----------------	----------------

Section 10

30 / 60 / 90 Day Roadmap

First 30 Days

Actions

Days 31-60

Actions

Days 61-90

Actions

Section 11

Recommended Next Step

Implementation Guide + SOP Book

CTA

REPORT 3

CTA

WRITING STANDARDS

Every recommendation should include:

Current State

Problem

Recommendation

Google Workspace Components

Expected Outcome

Complexity

Priority

Never provide vague recommendations.

Never provide generic recommendations.

Never provide recommendations without explaining WHY.

Every report should feel custom-built for the customer's business.
